PROFESSIONAL SUMMARY

Computer Science graduate with professional experience in Full Stack Engineering, backend development, and AI-powered applications. Skilled in developing scalable REST APIs, debugging enterprise applications, integrating LLM-based workflows, and optimizing system performance. Proficient in Linux and Windows environments with knowledge of cloud concepts, SDLC, automation, and modern software engineering practices. Strong analytical and problem-solving abilities with experience collaborating across cross-functional teams to deliver reliable production solutions.

TECHNICAL SKILLS

Programming Languages: JavaScript, Java

Frontend: React.js, Next.js, HTML5, CSS3, Bootstrap

Backend: Node.js, Express.js, REST APIs, JWT Authentication, API Development

Databases: MongoDB, MySQL

AI Technologies: LLM Integration, LangGraph, Agentic AI Workflows

Operating Systems: Linux, Windows

Tools: Git, GitHub, Postman, Socket.IO, dotenv

Core Concepts: Data Structures, OOP, SDLC, MVC Architecture, Debugging, Performance Optimization, API Integration, Problem Solving

PROFESSIONAL EXPERIENCE

Associate Full Stack Engineer

Jun 2026 – Present

BYLDD (Remote)

- Develop scalable full-stack applications using Node.js, Express.js, React.js, and Next.js.
- Design and maintain RESTful APIs and backend services for production systems.
- Build AI-powered features using Large Language Models (LLMs) and LangGraph workflows.
- Debug and resolve application issues, improving reliability and overall performance.
- Collaborate with developers and stakeholders to deliver production-ready features.
- Follow Git-based workflows, code reviews, testing, and agile development practices.

Full Stack Engineering Intern

Sep 2025 – Mar 2026

BYLDD (Remote)

- Built scalable MERN stack applications and backend APIs.
- Integrated AI capabilities into web applications using LLM technologies.
- Optimized APIs and fixed production bugs through systematic debugging.
- Worked closely with cross-functional teams throughout the software lifecycle.

AI/ML Engineer Intern

Sep 2024 – Feb 2025

Rooman Technologies, Bengaluru

- Developed machine learning models for weather prediction systems.
- Performed data preprocessing, feature engineering, and model optimization.
- Improved prediction accuracy through analytical evaluation and experimentation.

PROJECTS

AI Assistant

- Developed an AI-powered assistant using LLM integration for intelligent conversations.
- Implemented LangGraph workflows for automated task execution and orchestration.
- Built scalable backend services supporting real-time AI interactions.

Meeting Scheduler

- Built a scheduling platform using Node.js, Express.js, and MySQL.
- Integrated Google Calendar APIs for automated booking and event management.
- Developed REST APIs to support scheduling workflows and notifications.

Site Sculpto

- Developed a modular website builder with customizable components.
- Designed backend APIs for layout management and user configuration.
- Improved scalability through structured architecture and reusable modules.

Expense Tracker

- Built secure expense management APIs using JWT authentication.
- Designed maintainable backend architecture with clean coding practices.
- Managed expense records using MongoDB and RESTful services.

EDUCATION

Bachelor of Engineering (Computer Science Engineering)

Rajeev Institute of Technology, VTU Belagavi

Graduated: June 2025

CGPA: 8.7

Pre-University (PCMB)

Sujala PU College, Hassan

Aggregate: 98.8%

CERTIFICATIONS

- Data Structures and Algorithms – NPTEL
- Artificial Intelligence – NPTEL
- Introduction to Cloud – IBM
- NCC 'A' Certificate
